CTDA Renk Ton Farkı Rehberi / CTDA Renk Ton Farkı Rehberi

Farklı partiler şeklinde üretilen karolar arasında veya aynı üretim partisindeki karoların kendi aralarında belli derecelerde renk tonlarında farklılıklar oluşur. Kabul edilebilir renk ton farklılıklarını belirlemek için en azından aynı üretim partisine ait karolardan bir miktar mümkün oldukça gözden geçirilmelidir. Karoların seçimi hakkında oluşabilecek herhangi bir soru veya endişenin döşeme işleminden önce netleşmesi gereklidir.

V1= Aynı Görünüm: Karodan karoya çok az ve önemsiz farklılıklarla her bir karo aynı doku, renk, ton ve motive sahiptir.

V2= Hafif Farklılık: Doku ve/veya desende aynı renkler arasında farklılıklar olabilir. Karoların genel görünüşü oldukça benzerdir.

V3= Önemli Farklılık: Bir karoda bulunan renkler diğer karolardaki renkler hakkında bilgi vermekle birlikte renk yoğunluğunda önemli derecede farklılık gösterir. Karo üzerinde önemsiz gibi görünen bir renk diğer bir karo üzerinde ağırlıklı renk olabilir.

V4= Rastgele Farklılık: Bir karo diğer bir karoya göre tamamen farklı renkte olabilir. Bu karolar tüketici tarafından birkaç parça çıkartılacak şekilde seçilemezler. Renk farklılıklarından dolayı karolarda doğal bir görünüm vardır. Bu yüzden herbir döşeme özgün yapıda olur.

The color shade or shades of all tiles varies to some degree from piece to piece, from each production run to run. At least several pieces from the same production should be reviewed whenever possible to determine acceptable color shade variations. Any questions or concerns about your tile selection should be clarified prior to installation.

V1= Uniform Appearance: Differences among pieces from the same production run are minimal.

V2= Slight Variation: Clearly distinguishable differences in texture and/or pattern within similar colors.

V3= Moderate Variation: While the colors present on a single piece of tile will be indicative of the colors to be expected on the other tiles, the amount of colors on each piece may vary significantly. For example "that little bit of color" on one piece of tile may be the primary color on the next piece.

V4= Random Variation: Random color differences occur from tile to tile, so that one tile may have totally different colors from that on other tiles. Thus, the final installation will be unique.
