Hydromassage

Water therapy has been used as an alternative treatment method for centuries. The relaxing and refreshing power of water creates positive effects on the human body and psychology. Creavit's bathtubs with hydromassage system help to regenerate spiritually and physically by combining the refreshing power of water with high technology systems.

Hydromassage accelerates blood circulation and contributes to the removal of toxins from the body. At the same time, the contact of the body with water in the form of a massage stimulates the nerves. Thus, it helps to relieve some pain and get away from the stress of daily life. After sports activities or at the end of a tiring day, hydromassage is very effective in resting and regenerating the human body and provides mental relaxation.
